Education

De La Salle University Expected Graduation: Sep 2028
Bachelor of Science in Computer Science, Major in Network and Information Security *Manila, Philippines*

Work Experience & Leadership Roles

ING Hubs Philippines Oct 2026 – Present
Shared Tech Intern

DeckTradr Apr 2026 – Sep 2026
AI & Brand Design Engineer

- Annotated datasets and trained custom machine learning models for optical character recognition (OCR), image recognition, and AI-based card condition grading, improving scanner accuracy by over 30%.
- Conducted QA testing across iOS and web builds for a TCG point-of-sale and inventory management system, streamlining the support funnel and ensuring platform reliability.
- Automated marketing workflows with Claude for AI-driven content generation and TCG price-trend analysis, streamlining campaign planning and reporting.

Yergoods (Yerkoo) Apr 2026 – Jul 2026
Full Stack Shopify Developer

- Engineered a custom JavaScript Web Pixel to bypass Shopify's sandbox constraints, securing accurate e-commerce purchase and conversion tracking.
- Established backend API linkages connecting Shopify with Google Merchant Center, Google Ads, and Google Analytics.
- Performed end-to-end simulated checkout QA testing to debug, verify, and optimize tracking pipelines.
- Synthesized multi-platform data to optimize checkout conversions, ultimately driving a 55.97% increase in total sales.

La Salle Computer Society Oct 2024 – Aug 2026
Associate Backend Engineer

- Architected the backend infrastructure for ArcherBytes, a centralized academic resource platform built for over 20,000 DLSU students, using Next.js and PostgreSQL.
- Designed scalable Drizzle ORM database schemas for content types, user reactions, and community features.
- Integrated Better Auth with Google Auth for secure, school-exclusive authentication across the DLSU ecosystem.
- Earned Rank 2 in the Research and Development committee (Term 1 & Term 2, A.Y. 2025-2026) for technical contributions and leadership performance.

Projects

ReSole | *React Native (Expo), Next.js, Supabase, TensorFlow Lite, Gemini 2.5 Flash* Aug 2026

- Engineered a peer-to-peer footwear resale marketplace in React Native (Expo), integrating on-device computer vision (YOLOv8 Nano, TensorFlow Lite) and Gemini 2.5 Flash for automated condition grading and real-time price prediction.
- Built the Next.js, PostgreSQL, and Supabase backend with Drizzle ORM schemas and Better Auth for secure listings and transactions.

PromptPatrol | *Python* Aug 2026

- Engineered a hybrid SAST + DAST scanner in Python to audit LLM-generated ("vibe-coded") web apps for architectural blind spots introduced by AI codegen, statically flagging hardcoded secrets, unauthenticated routes, and weak JWT configuration.
- Built a dynamic fuzzing module to uncover IDOR flaws, missing rate limits, and verbose error leaks, automatically scoring each finding with a built-in CVSS v3.1 model.

Technical Skills

Security: Kali Linux, Networking, Python Automation, Wireshark, Nessus, Nmap, Burp Suite, Metasploit
Frontend: JavaScript, TypeScript, React, Next.js, Tailwind CSS, HTML5/CSS, Vite
Backend: Node.js, Python, Java, C, PHP, Express.js, NestJS, FastAPI, PostgreSQL, Prisma, Drizzle, REST, JWT
DevOps / Cloud: GitHub Actions, Docker
AI & Machine Learning: TensorFlow, NumPy, Pandas, Scikit-Learn, Anthropic, Claude Code
