EDUCATION

De La Salle University

Bachelor of Science in Computer Science, Major in Network and Information Security

Expected Graduation: Sep 2028

Manila, Philippines

WORK EXPERIENCE & LEADERSHIP ROLES

DeckTradr

Apr 2026 – Present

Software QA & Machine Learning Specialist

- Annotated datasets and trained custom machine learning models for optical character recognition (OCR), image recognition, and an AI card condition grading system, improving scanner accuracy by over 40%
- Conducted rigorous QA testing across iOS and web builds for a TCG point-of-sale and inventory management system, streamlining the support funnel and ensuring platform reliability
- Collaborated on data-driven marketing initiatives, conceptualizing content strategies based on TCG price trends

Yergoods

Apr 2026 – Jul 2026

Full Stack Shopify Developer

- Engineered a custom JavaScript Web Pixel to bypass Shopify's sandbox constraints, securing accurate e-commerce purchase and conversion tracking.
- Established robust backend API linkages connecting Shopify with Google Merchant Center, Google Ads, and Google Analytics.
- Conducted live end-to-end simulated checkout QA testing to debug, verify, and optimize tracking pipelines.
- Synthesized multi-platform data to optimize checkout conversions, ultimately driving a 55.97% increase in total sales.

La Salle Computer Society

Oct 2024 – Aug 2026

Associate Backend Engineer

- Architected the backend infrastructure for ArcherBytes, a centralized academic resource platform built for over 20,000 DLSU students, using Next.js and PostgreSQL.
- Designed and implemented scalable database schemas using Drizzle ORM, ensuring robust data integrity for complex content types, user reactions, and community-driven features.
- Engineered secure authentication and authorization flows by integrating Better Auth with Google Auth, enabling school-exclusive access and protected community interactions within the DLSU ecosystem.
- Recognized as Rank 2 in the Research and Development committee (Term 1 & Term 2, A.Y. 2025-2026) for exceptional technical contributions and leadership performance.

PROJECTS

Vibe-Coded Website Fuzzer | Python

In Development

- Engineered a hybrid security scanner and fuzzer in Python to audit LLM-generated ("vibe-coded") applications, targeting vulnerabilities introduced during rapid AI-assisted development.
- Implemented static analysis to detect hardcoded secrets and weak JWT validation, alongside dynamic endpoint fuzzing to uncover IDOR flaws, missing rate limits, and leaked stack traces.

AnimoNotes | Next.js, TypeScript, Prisma, Postgres, Better Auth

Apr 2026

- Developed a full-stack web application to centralize and streamline the sharing of academic resources for students within the College of Computer Studies at De La Salle University
- Engineered a responsive, type-safe frontend utilizing Next.js and TypeScript, and integrated Better Auth to enforce secure, student-exclusive authentication flows
- Architected the backend infrastructure using Prisma ORM and PostgreSQL, designing scalable database schemas for efficient storage and fast retrieval of user-generated study materials

TECHNICAL SKILLS

Security: Kali Linux, Networking, Python Automation, Wireshark, Nessus, Nmap, Burp Suite, Metasploit

Frontend: JavaScript, TypeScript, React, Next.js, Tailwind CSS, Styled Components, HTML5/CSS, Vite, ESLint, Prettier

Backend: Node.js, Python, Java, C, PHP, Express.js, NestJS, FastAPI, PostgreSQL, MySQL, Prisma, Drizzle, REST, JWT

DevOps / Cloud: GitHub Actions, GitLab CI, Docker

AI & Machine Learning: TensorFlow, NumPy, Pandas, Scikit-Learn, Anthropic, Antigravity, Claude Code, Opencode
